Dr. Newton's research suggests that the quantum bio hologram is created at the moment of conception and remains with us throughout our lives. It is a repository of all our thoughts, feelings, and experiences, and it continues to exist even after we die. This means that our consciousness is not limited to our physical bodies, but rather extends beyond them.

The implications of Dr. Newton's findings are profound. If the quantum bio hologram is real, then it means that we are all immortal beings. Our consciousness will continue to exist after we die, and we will be able to access our past lives and learn from them.

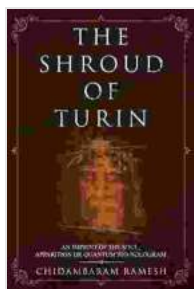

This book is a must-read for anyone who is interested in the nature of consciousness, the afterlife, and the possibility of reincarnation.
