For years, people have claimed to have seen the Bigfoot, but no one has ever been able to prove its existence. Until now.

In his new book, *Beast: Face to Face With the Florida Bigfoot*, author FirstName LastName recounts his terrifying encounter with the legendary creature. LastName was hiking in the Everglades when he came across a massive footprint in the mud. He followed the prints for hours, and eventually came face to face with the Bigfoot itself.

The creature was tall and muscular, with long, matted fur. It had a broad face with a pronounced brow ridge and deep-set eyes. LastName was

terrified, but he managed to snap a few photos of the creature before it disappeared into the forest.

LastName's encounter is just one of many that have been reported in recent years. Sightings of the Bigfoot have been increasing in frequency, and many people believe that the creature is becoming more bold.

What is the Florida Bigfoot? Is it a real creature, or is it just a myth? LastName's book does not provide all the answers, but it does offer a tantalizing glimpse into the world of the unknown.
