Print length : 24 pages

With simple, easy-to-understand language and engaging illustrations, this book explains the science behind climate change, its causes and effects, and what we can do to help. Climate Change For Babies is the perfect book to help your child understand the importance of protecting our planet.

What is climate change?

Climate change is the long-term change in the Earth's climate. It is caused by the increase in greenhouse gases in the atmosphere. Greenhouse

gases are gases that trap heat in the atmosphere, causing the Earth to warm.

What are the causes of climate change?

The main cause of climate change is the burning of fossil fuels, such as coal, oil, and gas. When these fuels are burned, they release greenhouse gases into the atmosphere.

What are the effects of climate change?

Climate change is having a wide range of effects on our planet, including:

- Rising sea levels
- More extreme weather events, such as hurricanes, floods, and droughts
- Changes in plant and animal life
- Melting of glaciers and ice caps

What can we do to help?

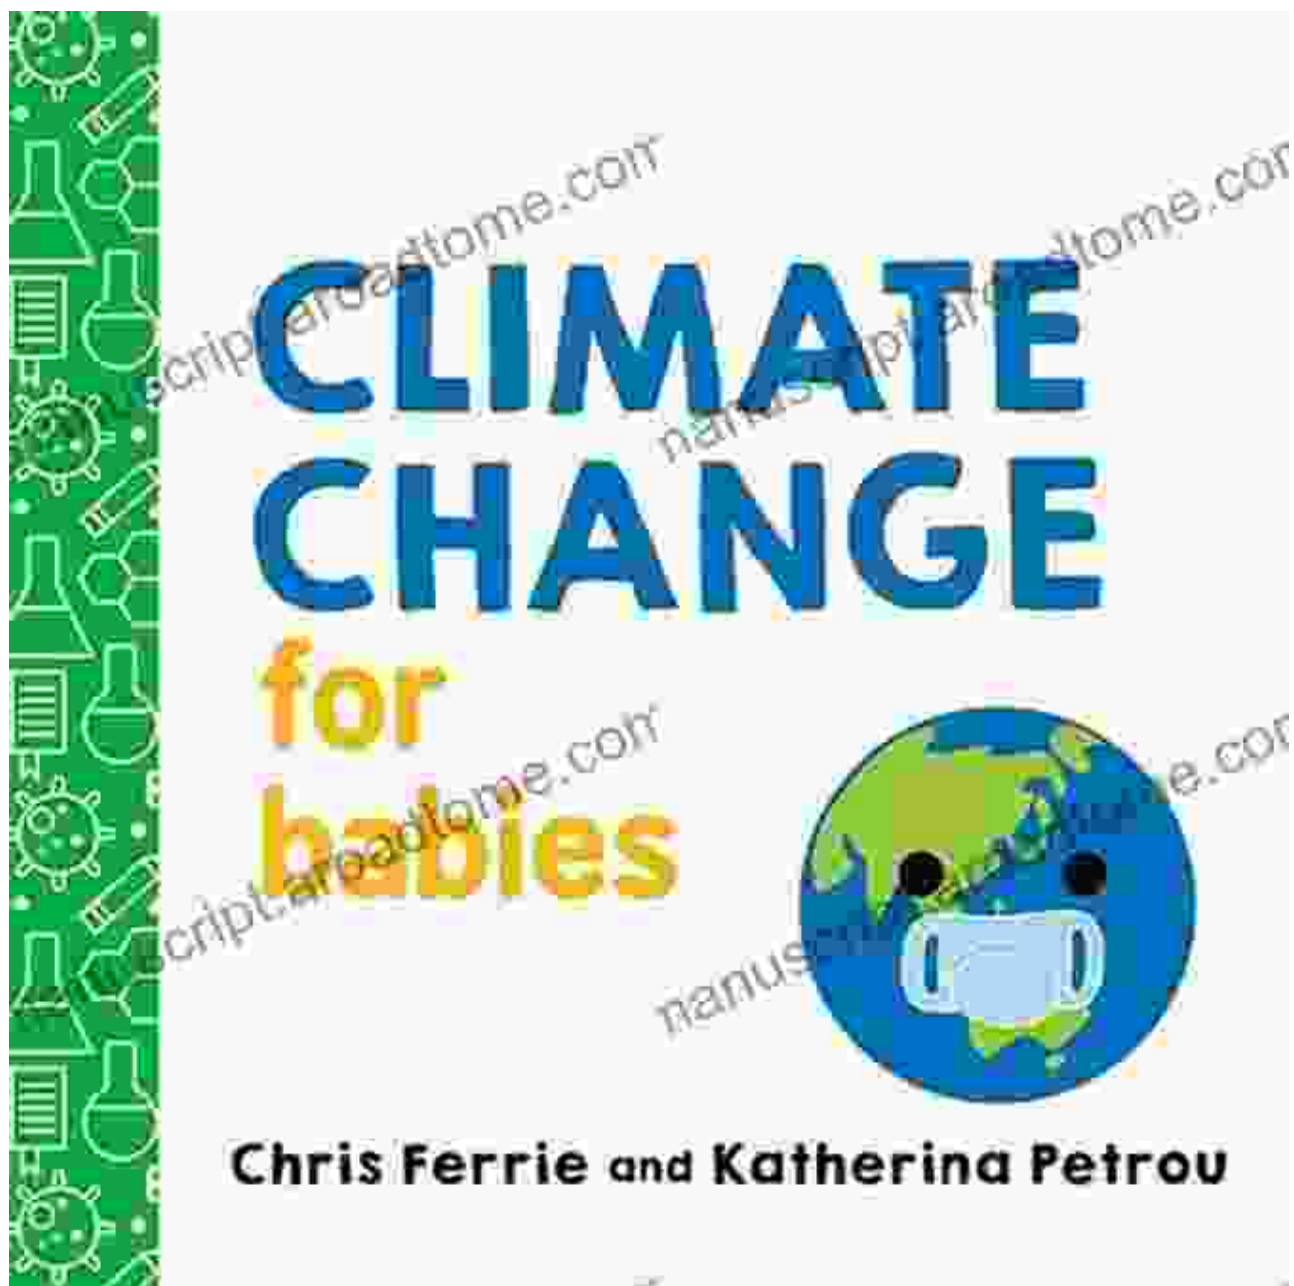

There are many things we can do to help reduce climate change, including:

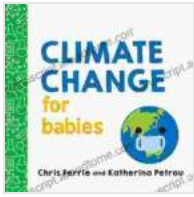

- Reduce our emissions of greenhouse gases
- Invest in renewable energy sources, such as solar and wind power
- Plant trees
- Conserve water
- Recycle and compost
