## What's New in Excel 2024?

Excel 2024 is the latest version of Microsoft's spreadsheet software, and it includes a number of new features and improvements. Some of the most notable new features include:

\* **Dynamic arrays:** Dynamic arrays are a new way to work with data in Excel. They allow you to create formulas that automatically expand to include new data, without having to manually resize the formula. \*

\* **XLOOKUP:** XLOOKUP is a new function that makes it easier to find data in a table or range. It's more powerful than the old LOOKUP function, and it's easier to use. \* **LET:** LET is a new keyword that allows you to assign names to intermediate calculations. This can make your formulas easier to read and understand. \* **Spill:** Spill is a new operator that allows you to spill the results of a formula into multiple cells. This can be useful for creating dynamic tables and charts.
